WORK WITH US!

SENIOR INTERACTIVE DEVELOPER

STRIKER
DIGITAL

WE REPLY TO EVERYONE, TRUE STORY.

WANT TO BE CREATING SOMETHING GREAT?

We are seeking a smart, passionate senior developer, who is always happy to raise up to a challenge, whilst coming up with innovative solutions or handling complex problems in the field of digital / online / interactive development.

As a Senior Interactive Developer, you have a strong understanding of the typical programming languages and related technologies e.g. **HTML, CSS, jS, PHP, SQL** etc. and ideally also a hands-on experience with various CMSs and frameworks e.g. **Wordpress, Symfony, Nette** and others, along with related versioning repositories e.g. **Git** etc. Your duties will include but won't be limited to:

- coming up with relevant server side settings and communicating such with the server admin
- setting up new web / SaaS projects and coming up with ideal technical architecture
- performing advanced development tasks in the relevant programming languages
- working on project technical documentation and specifications
- synchronising the development of multiple parties, on front-end and back-end

Despite seeking specific knowledge in certain fields, we tend not to categorize people's specializations, you are invited to be a part of cross-discipline team discussions - your input is always appreciated!

WHAT'S IN IT FOR YOU

- **unlimited vacation** *(sorry, the paid leave is still limited)*
- **location independent workplace** *(now you can work just in your shorts..at home of course)*
- **flexible working hours** *(as long as the things get done)*
- **working on projects which will be seen / used by a lot of people** *(rewarding experience)*
- **individual approach** *(like waves in the sea, we are all different)*
- **adequate compensation and benefits** *(morning coffee by the CEO included)*

WHAT WE EXPECT

- positive attitude and approach
- knowledge of HTML / CSS, jS, PHP / (my)SQL and or other relevant tech
- knowledge of Wordpress / Symfony / Nette / git and or other relevant tech
- ability to coordinate/lead a (sub)team of other developers
- ability to perform tasks timely and responsibly

"PROFESSIONAL" EXPERIENCE

- track record of successful deliveries of relevant web / interactive solutions, ideally from the ground up
- years of professional experience are not of the essence as long as you can demonstrate the required skills on sample projects you completed
- English on some level

APPLY

To apply for this position, drop us a line at aplayers@striker-digital.com and tell us, why we should choose you. Also, please do send examples / links to your previous work.

ABOUT STRIKER DIGITAL

As the agency for the digital era, we aim to be creating notable experiences, something people will remember. From start-ups to big brands, our ambition is to bridge the gap between great products & services and their users. We believe in excellent customer service, cross-platform approach, complementary online vs offline worlds and coffee. You can find out more about us at **striker-digital.com** or **our facebook**.
